ECONOMY: Lowest Unemployment Rate In The U.S.

The Omaha market added nearly 29,000 jobs year-over-year (YOY), and 493,000 people were employed in the second quarter of 2021. During the same time frame the jobless rate improved by 460 basis points (bps). Omaha's most recent unemployment rate was recorded at 3.0% and is currently the lowest in the Midwest. It continues to be one of the best in the U.S. and is well below the national average of 5.9%. According to the Moody's Analytics, the Omaha market is projected to see substantial job growth, adding 15,600 positions by the second quarter of 2022. While most jobs are expected to come back, the pandemic created long term trends such as shopping online that resulted in permanent job loss. Sectors such as leisure and hospitality and state/local government are expected to see the strongest growth, while retail trade employment is not projected to rebound to pre-pandemic numbers anytime soon.

SUPPLY AND DEMAND: Retail Market Sees Positive Absorption

So many uncertainties surrounded the future of retail after facing a market-shaping year caused by the pandemic. Consumer behavior changed overnight as in-person shopping declined and online sales reached record highs. As a result, bricks and mortar shops across the globe were forced to close their physical location. More than a year later, recovery is on the horizon. The Omaha retail market recorded approximately 82,000 square feet (sf) of positive absorption in the second quarter of 2021, while year-to-date (YTD) absorption totaled nearly 200,000 sf. Tenants taking occupancy in new construction has contributed to the positive activity we are seeing. Nearly 76,000 sf of new retail inventory was completed in the first half of the year and is already 86.0% occupied. Another 273,000 sf of new retail product is slated for completion in the last half of 2021 and is already 63.0% pre-leased. While leasing has picked up since the beginning of the pandemic, tenants are more hesitant to sign long term-leases. Pre-pandemic, retail lease terms averaged 4.0 years in Omaha. The current lease term average is 3.8 years.

PRICING: New Development Drives Rent Growth

Retail asking rents rose by \$0.09 per square foot (psf) YOY, reaching \$14.91 psf in the second quarter of 2021. The Sarpy West submarket has the highest asking rents in the market, averaging \$19.04 psf. Just 1.7% of the submarket's inventory is vacant, and limited supply has put upward pressure on rents. Sarpy West has experienced a substantial amount of development across all commercial real estate sectors over the last few of years, which has also contributed to the submarket's rent growth.
